GLOBAL to showcase industry-leading geospatial technology at USCG Innovation Expo '08

Virginia Beach, VA – October 30 – Global Strategies Group will demonstrate an industry-leading geospatial technology, WatchIT™, at the US Coast Guard Innovation Expo at the Virginia Beach Convention Center on November 18-20 (Booth #901). WatchIT™ represents a new generation of watchstanding technology, built around the watchstander, that automates routine tasks, enabling watchstanders to focus on making mission critical decisions in a more efficient and consistent manner, by aggregating sensors, controls and information into an extensible, geospatially aware application. WatchIT™ is an easy-to-use, flexible, Service Oriented Architecture-based technology solution for critical infrastructure protection, maritime domain awareness, facility security, regional watch, logistics management, transportation systems management, relief operations and any other operation that can be plotted on a geospatial display.
